Summary

Through my experience working at a startup, I have become great at learning on the go. I have gained experience in various fields of software development like frontend, backend, and DevOps. I am skilled in using technologies like Python, TypeScript, Go, Docker, as well as modern JavaScript frameworks. One of my proudest achievements is an open-source personal project of mine, which has reached over 130 stars on GitHub and counting, along with 18 contributors. I am currently studying for my BSc in software engineering and looking for challenging roles where I can apply my skills and continue to learn and grow.

Skills

TypeScript • Next.js • Python • Docker • CI/CD • Scrum

Work Experience

Software Developer

Jan 2024 – present

[Fysiofresh](#) • Part-time

Copenhagen, Denmark

Technologies: TypeScript • PostgreSQL • GitHub Actions • Docker • Test driven development

- Created and implemented a booking platform using Vue.js for the frontend, and Supabase for the backend, using their edge functions and PostgreSQL for procedural functions. I made integrations with our payment systems and used GitHub Actions and Docker to set up our CI/CD Pipeline.
- I helped onboard and train new interns, introducing them to our codebase, and test-driven development.

Education

Bachelor's degree: Software Engineering

Sep 2024 – Sep 2027 • 3 yrs

Aalborg Universitet

Copenhagen, Denmark

High school diploma: Social Studies, Mathematics, and Informatics

Aug 2019 – Aug 2022 • 3 yrs

Roskilde Katedralskole

Roskilde, Denmark

Certifications & Awards

Supervised Machine Learning: Regression and Classification - DeepLearning.AI, Stanford Online

Jul 2024

Languages

Danish (Native or bilingual proficiency)

English (Professional working proficiency)
